ALLEGRINI

Beauty Pills

### Product description

Presented in a bottle composed of ocean waste, these solid facial cleanser pills transform into a mousse upon contact with water. The pills' base is formulated from medium and medium/low molecular weight hyaluronic acids; natural betaine; plant-based collagen; organic jojoba and argan oil; corn and rice starch; and natural sugars. Water-free, the tablets leave skin moisturized. The formula successfully blends oil-based actives and dehydrated ingredients in a tablet that stays intact until activated. The ocean waste bottle contributes to marine ecosystem preservation, and the pills' water-free formula reduces weight and volume, leading to lower

CO<sub>2</sub> emissions in transportation. The solid format also eliminates the need for preservatives.

### Claims & Benefits

The idea of developing a mini pill cleanser derives on the one hand from producing a practical in use sustainable cosmetics formulated with skin friendly ingredients on the other looking for fun and unusual product use that allow the consumer a satisfying beauty experience both in terms of gestures and results. We therefore studied a small candy like cleanser developed with cutting edge technology The difficulty lies in being able to formulate a product that is solid enough not to dust until used but at the same time crumbly to be able to quickly transform into mousse.

## INNOV8 LABS

Innov8 Labs X Aquila Bioscience.  
Advanced Anti-blemish Serum

### Product description

The idea for this product came from an unexpected source: bioscience research aimed at protecting astronauts from pathogens in space. Recognising the rising global challenge of skin disorders and acne Aquila Bioscience and Innov8 Labs collaborated to incorporate the novel PCT into the Advanced Anti Blemish Serum. Through extensive R&D, the gel architecture emerged as the ideal vehicle preserving PCT stability while enabling optimal delivery and distribution across the skin. This biomimetic approach addresses the growing consumer demand for sustainable gentle alternatives to traditional treatments. Currently undergoing clinical validation this intelligent system represents a paradigm shift in acne care.

### Claims & Benefits

Leveraging biomimetic technology inspired by nature's defence mechanisms this innovative formula demonstrates 99.9% bacterial capture efficacy in vitro whilst delivering results. Through its patent pending PCT system this product reduces blemishes and helps prevent future breakouts. Users also experience visible improvements in skin clarity and texture. This sophisticated formulation enriched with niacinamide also strengthens the skin barrier whilst maintaining beneficial flora. Free from harsh actives, alcohol, and fragrance, this pH-balanced, dermatologically tested treatment provides consistent results through gentle yet powerful technology. This intelligent system supports skin health, particularly beneficial for blemish-prone complexions seeking sustainable results without compromise.

Sheer Dream Vegan Creamy Remover

### Product description

SHEER DREAM introduces a groundbreaking solid-to-balm nail polish remover, revolutionizing the removal process with a next-generation creamy formula. Unlike traditional harsh, flammable liquids, this semi-solid texture melts upon contact, dissolving polish effortlessly while nourishing and protecting nails. Powered by a unique network of natural waxes, it gradually releases a 100% natural solvent, ensuring deep yet gentle removal without weakening the nail structure. Enriched with Avocado Oil and Vitamin E, it hydrates, repairs, and strengthens. Its ergonomic stylo

Make Up Formula

format offers precise, mess-free application, making it the first travel-friendly remover of its kind.

### Claims & Benefits

- 100% Natural Formula – A gentle, plant-based remover with zero harsh chemicals.
- Semi-Solid Creamy Texture – Melts upon contact for a controlled, mess-free application.
- Nail-Friendly & Strengthening – Enriched with Avocado Oil & Vitamin E to nourish and condition nails.
- No Harsh Odors, No Greasy Feel – Leaves nails feeling fresh and healthy, with a light, pleasant scent.
- Non-Flammable & Low VOC – A safer, environmentally responsible alternative to traditional liquid removers.
- Easy & Precise Stylo Format – Designed for effortless application and portability

## CHROMAVIS FAREVA

Colorlock Wax

### Product description

We thought about those people who dye their hair at home and asked ourselves "how can we help them avoid getting their hands and skin dirty?". So we tried to create a stick that "blocks" the dye from penetrating the skin, and that's how the idea came about. We thought about the texture and the additional benefits it could offer. The texture creates a rich yet thin film on skin, protecting it without leaving it greasy. In addition to blocking the color, it reduces any rednesses caused by the dye and it nourishes thanks to many active ingredients inside.

### Claims & Benefits

The benefits of our product are: - protecting the skin from the dye - reduce the redness caused by the dye, thanks to the presence of extracts such as marigold, heder and rosa canina. - nourishment, thanks to the high amount of shea butter and almond oil. - antioxidant properties, thanks to the vitamin E. - an olive derived surfactant which helps to rinse-off the product after the use.

## COLEP CONSUMER PRODUCTS

Earth Couture Airstyle Hairspray  
Propelled By Nitrogen Air

### Product description

Earth Couture Air-Style Hairspray was created to fill a critical gap in the market—high-performance, clean styling without silicones, microplastics, or traditional propellants. Most hairsprays rely on synthetic fixatives and harsh ingredients, but through extensive research, we developed an eco-conscious, nitrogen-propelled formula that merges plant-derived, advanced styling agents for 24-hour curl retention and frizz control. With biodegradable and bio-based elements, it delivers professional performance while minimizing environmental impact. Fully globally compliant, it meets the highest regulatory standards, offering a first-of-its-kind styling solution aligning with clean beauty and sustainability demands worldwide.

### Claims & Benefits

24-hour flexible hold keeps curls and styles effortlessly in place—never stiff, never crunchy. Luxuriously fine, naturally-propelled mist delivers a weightless, even application for flawless styling. Soft, touchable finish with no sticky residue—just natural movement and elegance. Residue-free and re-styleable, allowing effortless touch-ups and easy washout. Infused with plant-powered ingredients, free from harsh chemicals and synthetic additives. Designed for all hair types—volumizes fine strands, nourishes curls, enhances natural beauty. Everyday glamour, effortless styling, delivering a flawless, long-lasting look. Sustainably chic innovation, merging high-performance with ecoconscious elegance. Globally compliant, meeting the highest regulatory standards.

## HCT BY KDC/ONE

### Capsule Airless Pump

#### Product description

The Capsule Airless Pump redefines dispensing with an innovative design that seamlessly integrates the cap as both the actuator and container, enhancing user experience with effortless functionality. Prioritizing sustainability, it features a mono-material, refillable construction that supports eco-conscious packaging solutions. One common challenge in traditional packaging is the fate of the cap once removed—users often set it aside, only to misplace or overlook it. Our thoughtful design eliminates this issue entirely by making the cap an essential part of the dispensing process, ensuring convenience, reducing waste, and enhancing both practicality and sustainability in a

single, elegant solution.

#### Claims & Benefits

The Capsule Airless Pump seamlessly merges sustainability, innovation, and practicality. Crafted from mono-material PP, it is refillable, reducing packaging waste and fostering eco-friendly practices. The innovative cap functions as both the actuator and push button, offering a distinctive, interactive dispensing experience. Equipped with advanced airless technology, it prevents contamination and prolongs the product's shelf life, ensuring optimal performance. The embedded nozzle delivers precise application, while the threaded closure guarantees a secure seal. Furthermore, the adjustable outer case allows for easy replacement of the inner vessel, providing a sustainable, refillable solution for long-term use.

### Product description

CAIOME is an AI-powered skin microbiome diagnostic platform designed for both home and professional skincare applications. Utilizing bio-optical technology and AI algorithms, it analyzes the skin microbiome ecosystem within just 5 minutes, providing real-time, data-driven skincare recommendations. UVL (Ultraviolet) and XPL (Cross-Polarized Light) optical imaging precisely measures the balance of beneficial and harmful bacteria on the skin. Integrated with Kolmar's skincare ingredient and formulation database, CAIOME ensures a personalized beauty routine tailored to each user's needs. CAIOME is a CES 2025 Picks Awards winner, solidifying its position as a pioneering AI-driven

skincare technology.

### Claims & Benefits

- Ultra-fast diagnostics & AI-powered analysis: Accurately diagnoses skin microbiome health in just 5 minutes and provides real-time AI-driven solutions.
- Precision microbiome analysis: Measures the balance of beneficial and harmful bacteria for a truly personalized skincare regimen.
- AI-based customized skincare recommendations: Factors in skin type, environment, and lifestyle for optimal skincare product selection.
- Dual usability for home & professional settings: Delivers dermatology-grade diagnostic results in a user-friendly format.
- Sustainability & eco-conscious design: Reduces unnecessary skincare consumption and incorporates biodegradable packaging and eco-friendly materials.

## PRINKER KOREA

Prinker Pop

### Product description

Prinker POP has been developed to bring a pop of color to makeup enthusiasts worldwide while offering a truly personalized experience. Using real-time makeup simulation with AI-generated models or their own photos, users can preview colors before printing, allowing them to create custom palettes only with colors they want, glitter or matte. The system uses proprietary, cruelty-free cosmetic inks and trays made from recycled paper, which are also customizable. Consumers today are more conscious than ever about sustainability, and traditional makeup palettes often contribute to

excess waste. Prinker POP addresses these concerns in an innovative way.

### Claims & Benefits

1. Customizable Palettes: Create makeup palettes with any shade using various customization options (photo simulation, AI-generated models, or color selection).
2. Inclusive Beauty: Offers color options for all skin tones, ensuring personalized beauty for everyone.
3. Cruelty-Free Makeup: Prinker POP ingredients are vegan and don't involve animal testing.
4. Eco-Friendly Design: Palettes are made from recycled paper, reducing plastic and makeup waste in the beauty industry.

### Eco-pulse™ Centella

#### Product description

ECO-PULSE™ Centella utilizes a technology originally applied in the food industry, newly adapted for the cosmetics industry. It preserves the freshness of raw materials while enabling rapid, efficient extraction. The process reduces thermal energy use and carbon emissions by over 20%, earning Green Technology Certification(GT-19-00697). Optimization trials identified conditions that maximize extraction efficiency with minimal energy consumption, confirming significant thermal energy savings. This eco-friendly product aligns with clean beauty and ethical consumption trends driven by environmental concerns, meeting consumer demands for soothing effects and vegan-friendly ingredients while promoting sustainability.

## Sustainability

## Winner

#### Claims & Benefits

ECO-PULSE™ Centella is an eco-friendly centella asiatica extract produced using a PEF (Pulsed Electric Field) process certified under Korea's Low Carbon Green Growth Act(GT19-00697) for its sustainable and environmentally friendly technology. This method reduces energy consumption and carbon emissions by over 20%. By applying a non-thermal, high-voltage pulsed process in a short time, we confirmed increased yields and higher concentrations of four key components—Madecassic acid, Asiatic acid, Madecassoside, and Asiaticoside—compared to traditional heat extraction. Additionally, the soothing effects were enhanced, making this extract ideal for skin-calming care and sustainable beauty products.

MEADOW

Meadow Kapsul™

### Product description

By modifying the can end, MEADOW KAPSUL™ technology enables its use across diverse sectors, including personal care and beauty. The result is an affordable circular solution for brands readily available at scale. Paired with a reusable dispenser brands can customise through licensing, it has proven to deliver an exceptionally convenient and intuitive experience for users. Its twist-to-open mechanism minimises effort, making it easy to operate and recycle. The MEADOW KAPSUL™ has been awarded the 'Best of the Best' Red Dot Design Award 2024, iF Design Award 2024, and D&AD Wood Pencil Award 2024 for Product

Design.

### Claims & Benefits

The MEADOW KAPSUL™ technology adapts infinitely recyclable aluminium cans into pre-fills while offering an unparalleled user experience. Through extensive user research, our technology has proven to be easy to use and easy to recycle. It also shows potential to drive repurchase intentions and to attract new shoppers to brands. From the consumer's perspective, convenience and intuitiveness are key aspects of our solution. The user experience stands out from current refill options by being mess-free. Users do not have to decant and pour the product directly into the dispenser; they simply need to change the can inside it.
