Micro Hy Balance Glow Cushion

Product description

The Micro Hy Balance Glow Cushion redefines beauty innovation with its unique 3-step ZIP technology, which compresses moisture, coverage, and radiance into one powerful cushion. Utilizing Aqua Zip Technology, it releases hydration upon application, ensuring a dewy, long-lasting glow. The formula's lightweight, breathable texture enhances the skin's moisture, while its cooling effect offers a luxurious, refreshing experience. Clinically proven to maintain makeup retention and improve skin radiance, this cushion is designed for all skin types, making it a versatile and must-have beauty essential.

Claims & Benefits

3-Step ZIP Cushion: Moisture compression, coverage lock, and release for long-lasting hydration and glow. Dual-compression Aqua Zip Technology: Provides intense hydration and natural radiance without greasiness. Proven Efficacy: Clinically proven 99.31% makeup retention after 6 hours and 13.5% improvement in radiance. Cooling Effect: Instantly cools the skin for a refreshed, radiant look. Core Ingredient: Aqua Golding Powder enhances moisture retention, perfect for hot or dry environments.

Meiyume (Hong Kong) Ltd

Replenish Liquid Glow Bronzing Serum

Product description

Replenish and optimize your skin with this transformative formula that delivers a sun-kissed radiance while deeply nourishing your complexion.

This serum boosts melanin production and enhances well-being with plant-derived 7-

Dehydrocholesterol, which converts to Vitamin D for improved skin protection. Mimicking the benefits of sunlight without UV exposure, it's versatile enough to be worn alone or blended with makeup, providing a natural, year-round glow that elevates your skin's beauty.

Claims & Benefits

- Boosts protective melanin and well-being molecules
- Gives skin a healthy glow
- Improves skin hydration
- Contains vitamin D3 precursor
- Buildable coverage
- Gives a bronzed appearance.

TAIR JIUH ENTERPRISE CO LTD
Multi-Sensorial Glimmer Clean Highlighter

Make-up Formula | Finalist

Tair Jiu Enterprise Co Ltd Multi-Sensorial Glimmer Clean Highlighter

Product description

This bouncy and fluffy highlighter consists of 81% of upcycled organic apple pomace, natural minerals, and cosmos-certified oils from a freshwater algae and Resurrection Plant. This replaces petroleum-based acrylic (PMMA), nylon, and silicon, which make the traditional mochi bouncy. This delicate natural composition activates the skin's bitter taste receptors to fight aging, fragrance receptors to increase alpha brain waves, and shield against blue light; and triggers visual and tactile joy. It is produced at room temperature by the liquid powder process, unlike mochi that requires 70 degrees celsius. This process makes embossing possible, which could not be done on mochi.

Claims & Benefits

More ingredients from natural origins instead of the petroleum origin makes the highlighter less irritating and lower carbon footprint. More powder ingredients and less oily silicon make the formula feel fresher and less sticky, glides better, blends better and more evenly. Topography analysis shows that using apple pomace to replace PMMA reduces skin roughness by 42%, fine lines by 28%, redness by 29% compared with mochi. Benefits of the several sensory stimulations : Fight cellular aging Induce calm mood Shield against blue light photo-aging Visual fun thanks to changing lights with changing finger pressure Stress-relief thanks to a unique bouncy touch.

The Pearlless Radiant Boosting Serum

Product description

The Pearlless Radiant Boosting Serum is a pioneering skincare formula that achieves a luminous, pearlescent glow without the use of traditional pearls or synthetic agents like titanium dioxide (TiO₂) or mica. Instead, it leverages the power of plant-derived, EWG Green-certified fatty acids to deliver a natural radiance. Through advanced solubilization technology, this serum offers unmatched versatility, seamlessly absorbing into the skin to enhance its natural glow. Cost-effective and eco-friendly, the serum uses third-generation pearlescent technology, where the random

crystallization of fatty acids reflects light, creating a sustainable and radiant effect.

Claims & Benefits

Pearl-Free Radiance: Achieves a powerful pearlescent glow without using synthetic or traditional pearls. **Natural Ingredients:** Uses only plant-derived, EWG Green-certified fatty acids to reflect light. **Solubilization Technology:** Applicable to any formula, fully absorbing into the skin for a smooth, radiant finish. **Cost-Effective:** More affordable than traditional pearl agents like TiO₂ or mica, offering a budget-friendly option. **Eco-Friendly:** Free from harmful ingredients, supporting environmentally conscious beauty.

Eco Slide Jar

Product description

The Eco-Slide Cream Jar is an eco-friendly product that reduces plastic usage by 40-50% and is made from 100% PET material, making it easy to recycle. It offers user-customizable design options, including a sliding refill mechanism, an integrated applicator, and various set configurations.

Claims & Benefits

1. Eco-Friendly: Reduces plastic usage by 40-50% compared to existing products and is made from 100% PET, making it easy to recycle.
2. User Convenience: Allows for easy refilling with a sliding mechanism.
- 3.

Customizable Configuration: Sets can be tailored to meet individual user needs. 4. Application Tool: A tool that can be stored within the cap provides professional care at home. 5. These features enhance user convenience while protecting the environment.

KR CO., LTD.

3'rd Residual Free Stick

Packaging Design & Materials

Finalist

KR Co., Ltd.

3'rd Residual Free Stick

Product description

The third-generation version of KR Co. Ltd.'s Residual Free Stick allows the last remaining amount of product in a stick to be used up, without any waste. The stick is constructed with a strong internal lifting core, which holds the product up until its final traces, allowing consumers to use the last remaining amount. The single-material container, which can also be made in PCR materials, can then be recycled with no remaining product in the stick, so it is easier for recycling plants to process.

Claims & Benefits

This is the world's first patented

technology product that can use the last remaining amount through the user's applying force while the internal lifting function holds the contents and prevents the contents from falling off.

HYBRID 2IN1 DROPPER

MYC PACKAGING INNOVATION CO LTD

Hybrid 2in1 Dropper

Packaging Design & Materials

Finalist

MYC Packaging Innovation Co Ltd Hybrid 2in1 Dropper

Product description

Life today is hybrid and on-the-go, making indulgent make-up 'moments' all the more desirable. MYC's Hybrid 2IN1 Droppers elevate regular teat droppers with an innovative, patented design that is both functional and transformative. Use the dropper to deliver the perfect amount of product without any waste, then brush the sponge onto the skin in sensual strokes – a ritual that makes blending easier and leaves a natural, glowy finish.

Claims & Benefits

A gentle squeeze of the teat delivers a microdose of the product via the

pipette to the sponge tip, which is then brushed onto the skin in strokes – making blending easier and leaving a professional, pearly-soft finish. In alignment with consumer trends, integrating the applicator directly into the packaging offers ease of use and a hassle-free approach that saves on precious time. The product can be applied both at home and on-the-go, and its compact design offers unmatched convenience.

AVANT PROTEINS PTE. LTD.

Zellulin® BioPlatform

Innovative Technology | Finalist

Avant Proteins Pte. Ltd.

Zellulin® BioPlatform

Product description

ZelluGEN™ is an ECM-targeted regenerative complex containing signaling peptides to give instructions within the skin to produce a firmer, smoother, more elastic skin texture. Zellulin® BioPlatform is a genre-defining technology that revolutionizes how we produce peptides. There are four traditional methods for peptide production: chemical extraction, conditioned medium, synthetic, and precision fermentation. The first two use animal-sourced raw materials and are not traceable or sustainable. The latter two, chemically defined, only yield one molecule per production. With our patented biotechnology, we can produce cell-identical multiple peptides, the same concoction a cell produces for its functioning sustainably, traceably, and marine-friendly.

Claims & Benefits

In a single-blind, placebo-controlled efficacy study performed on 60 subjects using an eye cream containing 1% Zellulin® ZelluGEN active, applied twice daily, there are statistically significant benefits measured in the skin conditions of product users vis-a-vis placebo users: (a) moisturizing efficacy – 3x skin hydration better than placebo; (b) improve skin barrier function – 5x skin trans-epidermal water loss less than placebo; (c) improve skin elasticity – 3x elasticity increase better than placebo; (d) increase skin firmness – 2x skin tightness increase better than placebo; and (e) increase dermal intensity – 2x collagen density increase better than placebo. (f) With 96.6% satisfied with the efficacy of the product.

BEAUNION COLOURS CO., LTD.

Jelly Spray Sunscreen SPF50+ ****

Product description

This SPF 50+ **** sunscreen is formulated with an 85% water concentration, without alcohol, and captured in a non-aerosol bottle. This formulation and delivery system minimizes skin irritation and the risk of inhalation during use. The sunscreen is formulated with “jelly tech,” which provides stability in the bottle, and then transforms into water drops when sprayed on and rubbed into the skin. The result is a non-sticky, invisible film of sun protection, with the milky texture becoming transparent when it’s applied to the skin. Also among the formulation’s ingredients are lecithin and Laminaria ochroleuca extract, which soothe and moisturize. The formula is non-greasy and can be used as a primer under make-up and has EWG Green certification.

Claims & Benefits

- Oil-free sunscreen spray.
- Non-greasy, Non-sticky.
- Lightweight.
- Cooling and refreshing on application.
- Milky look to transparent when swipe on skin.
- Alcohol free, and solvent free.

naturally, minimizing its environmental impact.

Product description

Crafted from molded pulp – composed of a bamboo and bagasse mix – with a paper drum shell, this jar is entirely biodegradable. In addition, the material is constructed using waterproof additives and lamination, so that formulations can be directly filled into the packaging, without the need to add additional barriers. This means the product can both stand as practical packaging while being biodegradable and eco-friendly. The jar is also designed with surface and edge protection to enhance durability, to meet both functional and aesthetic standards. At the end of its life, the jar will decompose

Claims & Benefits

The entire packaging is naturally biodegradable.

essential mirror

MYC
PACKAGING INNOVATION

MYC PACKAGING INNOVATION CO LTD

Essential Mirror

Sustainability

Finalist

MYC Packaging Innovation Co Ltd Essential Mirror

Product description

MYC's new PET mirror is an exciting addition to our 'Essential' line of 100% PET products. By incorporating a PET mirror into existing PET packaging, the entire product becomes 100% recycle-ready at end-of-use. No disassembling needed. The mirror can be shaped to fit several formats - from pressed powder compacts to multi color eyeshadow palettes - or even sold as a stand-alone make-up accessory. The first MYC product to benefit from this innovation is our Essential lightweight compact. By swapping the regular glass mirror for a PET alternative, eco-conscious beauty customers can enjoy a lightweight,

elegant and truly recyclable compact.

Claims & Benefits

MYC is committed to evolving its Essential Catalogue of PET products. These designs are sleek and contemporary, and their PET components can be separated for recycling readiness when the formula is finished. However, MYC recognizes that the time spent disassembling the PET from the non-PET components is disadvantageous and diminishes the probability of the user disposing of them consciously. The MYC PET Compact + PET Mirror enables easy, 360-degree recycling. By replacing glass with PET, the entire compact can be addressed to a facility for plastic recycling and no disassembly is needed.

TAIR JIUH ENTERPRISE CO LTD
Double Sphere Multi-Use Plant-Based
Color Makeup Stick

Tair Jiu Enterprise Co Ltd

Double Sphere Multi-Use Plant-Based Color Makeup Stick

Product description

This stick is formulated entirely with COSMOS-certified plant-based ingredients. Based on juices from 5 superfoods, which are beetroot, radish, purple yam, spirulina, and turmeric, TJ developed a rich collection of 150 shades. It is free of odor and skin irritants, unlike traditional vegetative and synthetic color sticks. The formula is lightweight, color-lasting, and transfer-proof. Its color remains stable even after a 12-hour sun test. The combination of superfood juices, plant waxes and oils, and natural antioxidants provides anti-aging and antibacterial benefits. The double-sphere geometry has a perfect angle for matching every ergonomics of using lip, eye, and cheek makeup.

Sustainability

Winner

Claims & Benefits

The double-sphere design ensures ergonomic application for all face curves. Its superfood juices and natural oils provide anti-aging and antibacterial care. Typical plant pigments fade fast. However, the superfood color possesses excellent anti-oxidative properties. Thus : It withstands light and heat much better, as demonstrated in a comparison test of 12-hour sun and 1-month 45°C heat. It doesn't develop an unpleasant odor over time. Superfood color is as vibrant as industrial colors, even for Carmine. COSMOS-certified vitamin E from mustard seed and a plant-based UVB protector further lengthen color longevity and stability, creating a natural preservative uniquely designed for this formula.
