Mango Splash Cooling Mask

Product description

Infused with a natural moisturizing agent, this mango-scented face mask ensures intense, long-lasting hydration, even post-rinse. Enriched with a Tropical Bioactive Complex (dragon fruit, mango, papaya, pineapple) for nourishment, it enhances skin's barrier function and texture. Sustainably sourced red algae-derived gelling agents provide a unique, jelly-like consistency that transforms into a refreshing, drip-free liquid upon application. Instantly soothes, cools, and calms redness, perfect after sun exposure or as a hydrating skincare treat.

Claims & Benefits

Hydrating and soothing after sun exposure Refreshing and cooling (can be stored in the beauty fridge for extreme cooling sensation).

Fibre Foils Limited

Curled Profile Telescopic Cans

Product description

Curled Profile Telescopic Cans are premium secondary packaging solutions crafted from paperboard. Designed for durability, they offer excellent product protection while being fully biodegradable and eco-friendly. Their innovative curled profile ensures a secure fit, making them ideal for delicate products across industries such as food, healthcare, and lifestyle. In 2024, this product won accolades for its innovative design and sustainability, including the India Star Award. With a focus on reducing environmental impact, these cans demonstrate Fibre Foils' commitment to creating

responsible packaging solutions without compromising functionality or aesthetics.

Claims & Benefits

Eco-friendly: Made from biodegradable materials, reducing environmental impact. Durable: Provides robust protection for delicate and valuable goods. Innovative Design: Curled profile ensures secure fit and aesthetic appeal. Award-winning: Recognized for sustainability and packaging excellence. Customizable: Tailored sizes and designs for various applications. Lightweight: Easy to handle and transport. Sustainable Solution: Encourages responsible product packaging practices.

IDM AUTOMATION SRL

Clay MI-150

Innovative Technology | **Finalist**

IDM Automation Srl Clay MI-150

Product description

CLAY MI-150 is the automatic technological answer to the up-to-date B&PC Industry needs. The future will be oriented towards multitasking products: CLAY MI-150 is the solution that allow a filling optimization process of all hybrid product categories guaranteeing either speed and efficiency or dosing precision placing the well-being of the operator at the centre.

Claims & Benefits

CLAY MI-150 is the automatic technological answer to the up-to-date B&PC Industry needs. The future will be oriented towards multitasking products: CLAY MI-150 is the solution that allow a filling optimization process of all hybrid product categories guaranteeing either speed and efficiency or dosing precision

placing the well-being of the operator at the centre. The claims of CLAY MI-150 are related to extreme PRECISION in dosing (from 1 mL to 250 mL) while maintaining the highest SPEED and FLEXIBILITY during the filling processes. The FLEXIBILITY benefit is linked to its outstanding design: the 15-positions rotary table is made by removable and interchangeable bush holders that allow the fastest format change, minimizing machine downtime with a user-friendly interface. The electronical components minimize the operator's delta error as any adjustment is carried out accurately directly from the operator panel via a single interface with self-diagnosis functionality. CLAY MI-150 is innovative thanks to the attractive and original style of the machinery designed to put the operator's well-being and safety first during filling processes. All the development has been carried out thinking the perfect coexistence of human and technological elements.

Lip Off Stain Liner

Product description

Fluid as ink, the Lip Off Stain Liner glides on effortlessly, allowing for precise application along the natural contours of your lips, or even across the entire lip surface. Once applied, it transforms into a smooth, luminous gel that sets into a flexible, plastic-like film. Allow the product to dry for at least one minute. Leave it on your lips for a longer time to achieve a true tattoo-like result. After drying, gently lift the edges and peel away the film to unveil a beautifully defined, long-lasting stain that contours and enhances your lips.

Claims & Benefits

Long-lasting effect Kiss-proof result
Tattoo-like finish Discover the pleasure of applying a stain liner that is vegan and formulated without EDTA, Oils, Paraffin (mineral oil), Parabens, Silicones, Cyclic Silicones and Phenoxyethanol. Formulated with 87% of natural origin ingredients, Lip Off stain liner is formulated with a blend of ingredients that makes the product lip-friendly. Vegetable glycerol, stain pigments and a film-forming polymer work together to ensure a gentle action on the delicate skin layers of the lips, promoting hydration and softness.

Niacinamide Skin Tone Corrector
Body Cream

smoother, and more youthful skin
from head to toe.

Product description

Our Niacinamide Skin Tone Corrector Body cream revolutionizes body care by offering the same advanced benefits typically reserved for facial skin. Enriched with a potent 10% Niacinamide concentration, it visibly reduces discoloration, improves uneven skin tone, and refines skin texture. Lightweight, fast-absorbing, and easy to apply, it hydrates deeply while strengthening the skin barrier. Suitable for all skin types, this vegan and dermatologist-tested formula includes 85% natural ingredients, free from silicones, PEGs, and colorants. Experience brighter,

Claims & Benefits

- Reduces discoloration for a more even skin tone.
- Refines skin texture, leaving it smooth and radiant.
- Deeply hydrates and improves skin elasticity.
- Strengthens the skin barrier to enhance resilience.
- Fights signs of aging by reducing wrinkles and stimulating collagen production.
- Dermatologically tested and suitable for all skin types.
- Vegan, 85% natural ingredients, PEG-free, silicone-free, and colorant-free.

Regi India Cosmetics Pvt Ltd

Don't Be Shy Cheek Potion

Product description

This innovative liquid blush features Advanced Hydra-gel Matrix, delivering a refreshing, gel-like texture that invigorates the senses with an ultra-smooth glide. Just a few drops provide a customizable, pigment-rich finish that's blendable, buildable, and incredibly lightweight. Enriched with active ingredients inspired by cosmetic surgery, it visibly blurs and plumps, enhancing hydration and reducing wrinkles for flawless, youthful cheekbones. This beauty elixir is a must-have for an instant, radiant pop of color on the go. We have won the Cosmopack Mumbai Award for the 2023 edition in the makeup category.

Claims & Benefits

- All in one formula: sensorial gel texture that gives a luminous, healthy glow while

- delivering long-term skincare benefits. • Flexible pigments that offer superior blendability and a buildable coverage that never looks patchy or artificial. • Advanced Hydra-Gel Matrix ensures exceptional moisture-locking while creating an ultra-light, refreshing sensation. • Breakthrough Hyalu-Cushion technology (2%) inspired by cosmetic surgery instantly plumps and fills wrinkles. • Premium soft-focus fillers create stunning luminosity while optically blurring imperfections for a perfected look. • Powerful Hold-Tech System combines silicone resin with auto-fixing agents for exceptional long-wear comfort. • Madagascar Ginger Root Extract (0.2%) provides superior protection against visible light, blue light, UV damage and pollution. • Perfect portable luxury combines skincare and color for a transformative cheek treatment.

EcoPure Dropper

Product description

The EcoPure Dropper is a revolutionary, single-material dropper designed to support sustainable practices in the cosmetic and pharmaceutical industries. Made entirely from polypropylene (PP), this dropper offers full recyclability without disassembly, promoting a streamlined recycling process. The dropper's structure includes a PP bulb, pipette, collar, and wiper, ensuring an eco-conscious choice for brands seeking to reduce their environmental impact. Available with PCR glass or plastic bottles, EcoPure Dropper delivers sustainability without compromising functionality or aesthetic appeal.

Claims & Benefits

100% Recyclable: Constructed entirely from PP, the EcoPure Dropper is designed for seamless recycling. **Eco-Friendly:** No need to separate components; the single-material design reduces waste. **Leak-Proof Seal:** Features a secure seal to prevent leakage, ensuring product safety. **Customizable:** Available in various colors to align with brand aesthetics. **Sustainable Packaging:** Compatible with PCR glass or plastic bottles, promoting a fully eco-conscious solution.

ISIMAT SIEBDRUCKMASCHINEN GMBH

The Koi Can

Packaging: Design & Materials

Winner

ISIMAT Siebdruckmaschinen GmbH
The Koi Can

Product description

The design was developed by combining state-of-the-art printing technologies such as ISIMAT's patented inLINE® FOILING and silkscreen printing in one machine. The concept aims to provide an aesthetically attractive packaging solution that brings both visual and haptic effects. This not only saves costs, but also increases environmental sustainability.

Claims & Benefits

The advantage of the inLINE® FOILING is that it can be easily

decorated with for i.e. silkscreen print or with matt spot decoration to create a multi-metallic effect. The use of UV technology also ensures faster drying and less energy consumption during the production process. This innovation represents a significant advance in the packaging industry as it combines efficiency with creative design possibilities. It solves the problem of standardization in the packaging industry by allowing brands to differentiate themselves from the competition through unique designs and surface textures.
