ALMA SERUM

Alma Skin Pistactive Fusion

ALMA SERUM

Alma Skin Pistactive Fusion

Product description

Plumping skin and shielding it from pollution, this electrospun macromolecular patch is formed from upcycled structural keratin and infused with an active ingredient derived from patented pistachio hulls. This composition creates a shield on the skin to protect against pollution and stimulate collagen, while the polyphenol buteina targets dark spots. Within the patch, the keratin is extracted from feather waste using an enzymatic method, while the phytochemical shield is obtained from pistachio hulls using a patented method. When applied to the skin, the patch “melts” on contact without leaving any residue,

Formulation | Finalist

releasing ingredients both immediately and over a 24-hour period. In a consumer test over 56 days, after using the patch dark spots lightened by 7.7%; skin elasticity rose by 4.0%; and moisture levels increased by 13.0%. To use, the patch is applied to dampened skin, upon which the electrospun membrane dissolves without leaving any heaviness or shiny traces.

Claims & Benefits

Skin Type & Target Area: Universally compatible with all skin types, including sensitive skin, specifically formulated for seamless application on the face and neck (cute).

Primary Skin Concerns Addressed: Targets premature aging driven by environment

Unseenplus Sunscreen Spf50
Broadpectrum

OTCM BY SUNJIN BEAUTY SCIENCE

Unseenplus Sunscreen Spf50
Broadpectrum

Product description

Encapsulating organic UV filters inside natural mineral silica – an innovation known as a UV Capsule – this formula creates a sunscreen formula that doesn't rely on oil, thus achieving clear, silicone-free, and ultra-lightweight SPF 50 broad-spectrum protection. The formula centers around a Skin Base Building Technology, which sees three synergistic systems work as one. These systems are composed of the UV Capsule, a patented porous silica encapsulation that houses sticky organic filters, eliminating tackiness while maximizing film uniformity; the TexFix Formula, a silicone-free 3D network that blurs pores and refines texture for a primer-like finish; and the OilZero Powder, which absorbs three times its weight in sebum to maintain a fresh, matte finish and a stable UV film. The result on the skin is silicone-free SPF protection combined with a perfected, velvety-matte finish.

Formulation

Finalist

Claims & Benefits

- * Completely transparent - zero white cast, suitable for all skin tones
- * SPF50 / Broadpectrum / PA++++ (clinically confirmed: mean SPF 58.3; determined SPF 54.4)
- * Silicone oil-free - organic UV filters encapsulated in mineral silica, eliminating the need for oil dissolution
- * Fresh, non-greasy finish without silicones - enabled by UV Capsule + TexFix Formula + OilZero Powder
- * Skin texture correction effect - visibly blurs pores and surface irregularities like a primer
- * Velvety matte finish sustained throughout the day by OilZero Powder (3x oil-absorption capacity)
- * Excellent makeup compatibility - ideal as a priming base before foundation
- * Supports uniform UV-protective film formation across the full skin surface
- * Enhanced adhesion and extended wear longevity
- * OTC-compliant formulation for global market access (FDA + EU Cosmetics Regulation)

SOLÉSENCE

Scalp Screen Dry Shampoo Spf 45+
Sunscreen

SOLÉSENCE

Scalp Screen Dry Shampoo Spf 45+
Sunscreen

Product description

Dry shampoo is enhanced to protect the scalp from UV damage in this formula. The formula is powered by Solésence Klear™ technology, a non-nano, mineral-based, broad-spectrum SPF 45+ sunscreen that protects the skin from 97%+ of UV radiation, while reducing pollution-induced free radicals by over 85%. The ingredient can also be combined with an antioxidant complex that works in synergy with Solésence Klear™ to boost antioxidant activity by as much as 200%. Also among the ingredients are zinc oxide made using a water-free production process; binchotan white charcoal and microzest bamboo which absorb excess oil and perspiration; 2% niacinamide which contributes to skin soothing, reducing itchiness and irritation; natural chickweed herb to soothe redness and inflammation; and witch hazel leaf extract which soothes inflammation, regulates oil production, and deodorizes. The formula

Formulation

Finalist

comes in one universal shade to suit multiple hair colors and types.

Claims & Benefits

Solésence Klear™ technology-enabled claims: Non-nano, mineral-based, broad-spectrum SPF 45+ sunscreen protects the skin from 97%+ of UV radiation. Reduces pollution-induced free radicals by over 85%. *If added* a super-powered antioxidant complex works in synergy with Solésence Klear™ to boost antioxidant activity by as much as 200%. Zinc Oxide is made using a water-free production process

Select additional claims:

• Versatile universal shade fits with multiple hair colors and types. Binchotan white charcoal and microzest bamboo absorb excess oil and perspiration. 2% niacinamide contributes to skin soothing as well as reducing itchiness and irritation. Natural chickweed herb helps to soothe redness and inflammation. Witch Hazel Leaf Extract soothes inflammation, helps to regulate oil production, and deodorizes. Gluten-free and vegan

COLEP CONSUMER PRODUCTS

Skin Shift Repair Wand – Scar Recovery Pen

COLEP CONSUMER PRODUCTS

Skin Shift Repair Wand – Scar Recovery Pen

Product description

Artemisia Capillaris, also known as Korean mugwort, is a resilient Eastern herb that thrives through Korea's harsh summers and winters. This high-performance soothing serum contains PDRN extracted from mugwort, known for its calming and skin-repairing properties. It absorbs smoothly with a silky, non-sticky finish, making it gentle even for sensitive skin. Combining natural soothing benefits with regenerative power, it helps restore skin balance and clarity. Ideal for daily use on all skin types.

Formulation

Winner

Claims & Benefits

Visibly improves the appearance of scars for smoother, more refined skin

Promotes a more even skin tone while reducing the look of redness

Supports softer, more uniform skin texture over time. Enhances elasticity and comfort in fragile, newly formed scar tissue. Suitable for sensitive scars, including surgical, acne, burns, hypertrophic and keloid. REPAIR & PROTECTION

Creates a breathable, non-occlusive protective layer to shield delicate newly-formed skin Helps maintain optimal healing conditions for improved scar quality. Strengthens the skin barrier and reduces transepidermal water loss HYDRATION & COMFORT

Provides long-lasting hydration to reduce dryness and tightness. Soothes sensitive skin and improves overall comfort during recovery PERFORMANCE & SENSORY

Lightweight, fast-drying texture suitable for daily, repeated use

Non-occlusive formula offers a modern alternative to silicone-based treatments.

Precision pen format enables controlled, hygienic, and targeted application

CLEAN & FORMULATION APPROACH

Vegan, high natural origin formulation aligned with clean beauty principles. Microplastic-free, alcohol-free, and fragrance-free for optimal skin tolerance

SUITABILITY

Suitable for a range of scars, including surgical, acne, and burn-related marks

Dermatologically inspired for consistent, long-term visible improvement.

Dock & Go Airless

Product description

This fragrance discovery case has been crafted as a modern interpretation of a vintage cigar case, blending nostalgia with contemporary design. Holding five miniature vials of perfume, this metal case elevates the fragrance discovery and unboxing experience. It offers a welcomed alternative to conventional, disposable fragrance discovery set packaging, so the case becomes a desirable object that lasts. With its keepsake design, the case is intended to create a more meaningful connection between a brand and the consumer. The case is crafted in premium zinc alloy decorated with laser engraving and is designed for long-term re-use.

Claims & Benefits

Maintains full airless functionality in both docked and portable modes

Eco-friendly refillable structure

Stopper and cap systems can be applied simultaneously or selectively depending on usage

Intuitive attachment and detachment mechanism

NUON MEDICAL

Cooling Eye Therapy Applicator

Packaging: Design & Materials

Finalist

NUON MEDICAL

Cooling Eye Therapy Applicator

Product description

Device and formula are combined in one in the Cooling Eye Therapy Applicator. The device is engineered so it integrates semiconductor cooling technology and red-light therapy, enhancing the performance of eye cream delivered through its dispensing tube's controlled application. Additionally, the applicator's cooling metal surface soothes puffiness and signs of fatigue, while the integrated light therapy supports refreshed-looking skin. Designed to address concerns such as dark circles, eye bags, fine lines, and fatigue, the device can be used daily, for up to two minutes on each eye, and combines cooling relief, targeted application, and light-based care in one device. In consumer tests, 93% reported an immediate soothing sensation and a reduced feeling of puffiness after use, while after two weeks 88% reported a visible improvement in eye area freshness and reduced signs of fatigue, when using

red-light therapy as part of an eye care routine.

Claims & Benefits

The Active Applicator - Cooling Eye Therapy Applicator helps reduce the appearance of puffiness and tired-looking eyes through semiconductor cooling technology that delivers an immediate soothing effect. Integrated red light therapy supports skin revitalization and improves the overall appearance of the eye contour area. The precision dispensing tube allows controlled and hygienic application of eye cream, enhancing absorption and reducing product waste. It is designed to address common concerns such as dark circles, eye bags, fine lines, and fatigue while improving comfort during use. Suitable for daily morning or evening routines, it provides a spa-like sensory experience at home, combining cooling relief, targeted application, and light-based care in one device.

SHINKWANG M&P

Zero Touch

Packaging: Design & Materials

Winner

SHINKWANG M&P

Zero Touch

Product description

Offering a hands-free application, Zero Touch [NJ1.1] is a mono-material PP packaging solution made with a patented piston dispensing technology. When pressed, the formula is dispensed directly through the center of the integrated puff applicator for hygienic application without touching the contents by hand. And thanks to the tube's air pressure-driven piston, which pushes the formula upward – right up until all the formula has been used – excess residue and product waste are minimized. The package also includes an on/off locking function to prevent leakage when the tube is being carried. Suitable for foundations, sunscreens, and creams, the packaging was inspired by consumers seeking out cleaner and more convenient experiences when using a product outdoors. The tube is crafted from mono-material PP, with a matte PP option, and is compatible with silk screen printing, hot stamping, and eco-friendly label applications.

Claims & Benefits

- ★ Patented air pressure driven piston dispensing technology
- ★ Hands free application through integrated puff dispensing system
- ★ Hygienic application without direct hand contact with the formula
- ★ Complete product evacuation minimizing unnecessary residue and waste
- ★ Stable and controlled dispensing performance
- ★ On/off locking function for leakage prevention and portability
- ★ Mono material PP structure supporting improved recyclability
- ★ Suitable for foundations, sunscreens, soothing creams, ointments, and various skincare formulations
- ★ Compatible with multiple viscosities from lightweight to high viscosity formulas
- ★ Smooth and comfortable application experience directly through the puff
- ★ User friendly design suitable for outdoor activities and daily convenience
- ★ Easy to use for elderly consumers and users with weak hand strength
- ★ Premium usability combined with practical sustainable packaging solution
